

Drinking Cow Pee To Prevent Cancer !?!?

A growing sect of Hindus in India believe that drinking fresh cow urine will prevent cancer. They believe that the cow is a sacred animal, and more and more of them are claiming that cow urine has divine healing properties.

Jairam Singhal is a firm believer in its health benefits. Singhal has been drinking cow urine for over a decade.

"I had diabetes, but ever since I started drinking cow urine, my diabetes levels have been under control," the 42-year-old said.

In the northern city of Agra, dozens gather at Singhal's cow shelter to have a fresh glass of cow urine.

"Lots of people come here. And of late, the numbers have been rising. We all gather in the morning and drink fresh urine that Mother Cow offers us," Singhal said.

Many Hindus claim that cow urine can be used to treat cancer, diabetes, tumors, tuberculosis, stomach problems, and much more. They also claim that drinking cow pee is the best remedy for baldness.

As you can imagine, there are people - lots of them - who oppose these claims. They say that cow urine doesn't have any healing properties. They believe that it's just a bunch of people believing in myths.

"People keep saying all these bad things about cow urine, but we don't mind," Singhal said. "People don't know what this is. They have never experienced the taste of cow urine or its effects, so how can they judge it?"

Singhal says he is interested in selling cow urine in various forms. Eye drops, stomach medicines, toothpaste, and other things can be made from cow urine he said.

"Many cow shelters are already manufacturing these products. There is a lot of demand for these products. They have good sales. They can be healthy as well as profitable," Singhal said.
