

What did This Dog Eat?!

Great Danes are very large dogs. In fact, the tallest dog in the world is a Great Dane. The biggest dog in the world is also a Great Dane. Great Danes have big appetites too! This means that they eat a lot.

This story is about a 3-year-old Great Dane in America. Let's call him Big Guy. Big Guy's owners went out and left him home alone. He's a Great Dane - he got hungry. His owners weren't home to feed him. So, he found something to eat.

When Big Guy's owners arrived home they saw that something was wrong. Big Guy was miserable and retching. His owners rushed him to an animal hospital.

What did he eat?!

The vet took x-rays of Big Guy's stomach. She could see something big in his stomach - and it wasn't dog food! It was a foreign material. She decided to operate. The surgery took 2 hours, but the mystery was solved! Big Guy had 43 $\frac{1}{2}$ socks in his stomach! Yes, he ate 43 $\frac{1}{2}$ socks! No one knows where the other $\frac{1}{2}$ a sock is....

Big Guy is fine now and life is back to normal.

Did your pet ever do anything strange?
